Experience

Luxolis | Remote

3D JavaScript and C++ Engineer | 08/2023 - 11/2023

Proficiently developed cutting-edge 3D applications using a combination of JavaScript and C++, focusing specifically on Luxolis's CAD system. Leveraged JavaScript frameworks such as Three.js to create immersive 3D experiences, while employing C++ for performance-critical components tailored to the CAD environment. Collaborated closely with Luxolis's AI team to integrate new bug-fixes of the CAD system, ensuring seamless interaction between the 3D environment and AI algorithms. Successfully contributed to the continuous improvement of Luxolis's CAD technology stack through innovation and problem-solving, ensuring a high-quality end product for users.

Testronic | Warsaw, Masovian

FQA Technichian | 06/2023 - 11/2023

Collaborated closely with Unity-based projects, conducting manual testing of games and implementing necessary fixes. Effectively worked with international teams, ensuring seamless communication and coordination. Proficiently handled beta versions on Steam, actively engaging in the process of writing and closing Jira tickets to track issues and progress efficiently. Demonstrated success in ensuring the smooth release of projects on Steam, contributing to the overall quality assurance process.

Dragons Lake | Remote

Unreal Engine Developer | 03/2022 - 02/2023

Worked remotely, collaborating closely with project teams to develop immersive experiences using Unreal Engine and C++ for gameplay programming. Successfully managed bug resolution and contributed to the implementation of new game features, leveraging the power of Unreal Engine to enhance player engagement and overall game experience. Additionally, proficiently utilized version control systems to contribute source code and utilized Jira for task management by writing tickets to track progress effectively.

Skills

C++, Unreal Engine, C#, Unity, Node.js, Three.js, React

Education

National Technical University of Ukraine | Kyiv

Computer Science | 07/2024
